LINKAGES

The goal of the Linkages program is to prevent or delay institutionalization of frail elderly and functionally impaired adults by providing services that enable them to remain in their homes.

What is the Linkages Program?

The Linkages Program is a “gap-filler” that helps persons at risk of being institutionalized who are not receiving other case management services, including those provided through the departments of Developmental Services, Mental Health or Rehabilitation.

Who can receive services?

Individuals who are:

- 18 and older
- frail or functionally impaired
- at risk of placement
- not receiving case management services

What services are provided?

Linkages provides case management, information and referral, in-home care, and respite care to help the individual remain safely at home.

Are there income criteria?

There are no income criteria for the program. Clients who can afford to pay are requested to contribute a share of cost for case management services and/or services that are purchased. However, no eligible persons will be turned away just because they cannot or will not pay.

How does someone sign up for Linkages?

Phone the toll-free 1-877-565-2020. Tell the person taking your call that you want to be referred to the Linkages program. A Linkages Case Manager will contact you to make an appointment to discuss and determine your needs.
